TRENIC

THE HANDS-FREE COMMUNICATION AUTHORITY

ABOUT US

Trenic Industries PTY Ltd was established in 2002

LEVEL 2

B B B E
CONTRIBUTION

Trenic Industries PTY LTD was established in 2002, and appointed as a Plantronics headset reseller, servicing the South African call center and back office market.

Changes within the ICT sector quickly gave way for the need to supply headsets and related products, including VOiP telephony products, to an ever changing landscape where headsets were being used not only in the call center space, but by users with integrated soft-phone applications.

Trenic rapidly established itself as a value added reseller, offering support and services on all of the products it supplied, and by 2005 had a full time technical team supporting its ever growing user base.

With clients requiring many different applications to suite their environments and budgets, Trenic introduced multiple headset brands to its offering, increasing our ability to service our client

base and giving them a wide variety of best of breed items from leading manufacturers globally to choose from.

By 2006 Trenic Industries was offering Audio and Video conferencing solutions as well as VOiP telephony headsets, further enhancing its product offering.

Changes in the ICT charter in 2016 meant the launch of Trenic Technologies PTY Ltd, a level 2 BEE contributor.

Trenic Technologies has already established itself as an Authority within the Unified Communications and Outsource call center space, with a growing list of large end users, backed by the experience, efficiency and creativity that Trenic has become synonymous with.

Our Mission

- To be Africa's Handsfree Authority
- To provide unparalleled service
- To Exceed Our customers expectations

Our Headset Brands

We offer communication solutions that integrate across multiple devices, enabling you to connect, where, when, and how you want. Trenics product offering gives you the broadest range of headsets and headphones from the worlds leading brands to suite every application.
